

PRIMO

Primo is a well-formed basic seat with good ergonomic properties. Primo has been delivered in various versions for different types of applications, from schools to theatres. It can be used with all types of desktop solutions, such as armrests that fold down or tables attached to the back of the seat. The ergonomic Primo family also includes PriMove, moveable bench solution, and Primo telescopic chair.

Construction: Steel tube 30 x 40 mm. The seat works with counterweight placed above seat inside the upholstery. The underside of the seat can be upholstered or veneered plywood/perforated. The backrest is upholstered, foam shaped to give good seating comfort. Background is 9 mm veneered plywood.

Writing tablet: All types available

Armrests: Wooden armrest straight or L shaped or without armrest

Foams: Seat 5 cm CMHR50, back 4 cm/6 cm CMHR35

Angle of back: 12 or 17 degrees

Wooden parts: Birch, beech, ash, maple, oak etc. lacquered, stained or painted with the desired color

Metal parts: Epoxy painted with a desired RAL color

Fabric demand: 1.1 m / pcs

Meets fire safety requirements:
