

Lightness B

design Samuli Naamanka, 2012

The Lightness family of chairs is focused on functional design with carefully finished details.

The Lightness chairs are known for their versatility, being light in weight, yet sturdy, as well as easy to stack. Available both with or without upholstery as desired. All details are carefully designed. There are no visible attachments in the backrest of the chair. Lightness family of chairs is made in Finland. Lightness chair is an outstanding all-purpose chair with its compact stackability, excellent ergonomics and comfort, versatility. Stackable chair designs and challenged out a design that would allow the greatest number of chairs to fit into the smallest space. Lightness chairs could stack 40 chairs to a single dolly. 40 chairs on a single trolley take up only 0,47 m² of floor space.
